Making life warmer

Andrea Larsson is an interior stylist and, in recent years, has produced furnishings for private individuals and companies. She has been the host of various TV programmes, produced articles for various home magazines and written home furnishing books on wallpaper etc. In addition to designing furniture and wallpaper in her own name, Andrea also runs her own clothing and home living business, Daisy, with her sister.

Colourful energies are also a feature of Andrea's life when she's not busy inventing a new wallpaper design or out visiting a customer. That's why one of her favourite pieces of furniture in her fantastic home is a Morsø S10.

"My home expresses my style. Put together and inspired by many different impressions, styles and feelings. And in the middle of it all is my Morsø stove, spreading warmth, comfort and happiness".

A new Original

With the Morsø S series we're breaking 157 years of tradition of only producing stoves made from cast iron. We're introducing an exciting series of quality steel stoves with a completely new focus on design. Light and elegant.

All the stoves live up to Morsø's philosophy of creating the optimum combination of design, quality and materials. That's why the new stoves also contain an element of cast iron.

All Morsø S-variants come with a 5-year guarantee, see Morsø's terms of guarantee.

A unique experience of a fire on your wall with this exclusive widescreen fireplace insert from Morsø.
